Professional Summary

Detail-oriented Statistics graduate with strong analytical and problem-solving skills and a passion for data and technology. Possess a working knowledge of Python (Pandas, NumPy, Matplotlib, and Seaborn), SQL, Microsoft Excel, and Power BI for data cleaning, analysis, visualization and reporting. Hands-on experience with Django and applying machine learning techniques through academic and personal projects in data analysis, machine learning, and backend web development.

Passionate about transforming data into meaningful insights and developing practical web app solutions. A fast learner with excellent communication and teamwork skills, eager to contribute to organizational success while continuously expanding my technical expertise.

Technical Skills

Programming

- Python
- SQL

Backend Development

- Django

Data Analysis

- Pandas
- NumPy
- Microsoft Excel
- Power BI

Machine Learning

- Scikit-learn

Data Visualization

- Matplotlib
- Seaborn

Database

- PostgreSQL

Version Control

- Git and GitHub

Projects

Student Academic Performance Prediction System

Technologies: Python, Pandas, ML Techniques.

Education

B.Sc. Statistics - Umaru Musa Yar'adua University, Katsina.

CGPA: 4.05/5.0

Relevant Coursework:

- Statistical Analysis
- Regression Analysis
- Operations Research
- Probability Theory
- Time Series Analysis.
- Statistical Modelling

Experience

Mathematics Instructor: Taalim College, Ilobu, Nigeria.

Feb 2026 – Present

- Assisted students through structured one-on-one academic support, improving understanding and performance.
- Managed lesson schedules, student progress tracking, and instructional planning efficiently.
- Applied analytical thinking to identify learning gaps and develop effective improvement strategies.
- Utilized technology tools to support learning and maintain organized academic records.
- Collaborated with colleagues to improve student engagement and classroom effectiveness.
